## CONSENT FORM FOR WELLCOMM ASSESSMENT

NAME OF CHILD .....

DOB.....

In order to support the speech, language and communication of all children in our setting, we have purchased a Wellcomm Toolkit. Members of the staff team have been trained how to use this resource and we are confident that this will provide an effective way for us to assess the children's communication abilities. It is also great fun for the children to do and the games and activities in the pack are very child friendly. If we find that the assessment highlights any areas which need support, the toolkit can also provide appropriate activities while a referral to a Speech and Language Therapist is made. In some cases, use of the pack can improve communication to a level where support is no longer required.

In order to use this Toolkit with your child, we need your written permission. Please could you indicate below if you are happy / not happy for us to assess your child using the Wellcomm pack.

You are welcome to discuss the assessment methods used with your child's Key Worker and can withdraw your consent at any time if you so wish.

Please delete as appropriate:

I give permission / I do not give permission

for my child to be assessed using the Wellcomm Speech and Language Toolkit.
